SG TAKAFUL

My hope. .

- **When first time I joined this training, I had learn more about takaful/insurance. Before this, I have no idea about takaful and I just know that takaful for protection medical card only but actually takaful not for protection medical/healthcare planning only but also for income protection, education planning, debt cancelation and retirement.**
- **Since I have learn more about Great Eastern Takaful and how takaful helpful others to protect their life such as protection for health, for saving and also for asset and can provide us more benefits, I want to help many people's to understand this too.**
- **From this training, I hope that I can improve myself, my knowledge to be the best takaful planner especially my life and to have a better future. I would like to educate others about how important to have a protection in their life.**
