

# The Internship Experience

## ***What Interns are Saying***

This internship was by far the most important thing I've done when it comes to my career. This internship definitely confirmed that this is exactly the kind of work I want to do. Interning at the Super Group has been such a rewarding and incredible experience. Overall, I really enjoyed my internship. I learned a lot from my internship experience especially from my IO Andy Lim Wee Kean which I admirer him a lot. I admirer his positive energy yet really supportive towards encourage us to chase for our dream. I gained a lot of knowledge and skills from him from the way of communication skills until how we deal with our life. All of these will help me in a future career as a financial planner which I wont regret to be one of it consider this internship to be a valuable experience for me.

My goal with each summary I wrote was to capture the essence of the person I had just observed. I found joy in making friends with my intern mates which they are really supportive towards each other yet really care with us . The door is open for me to contribute and perhaps even be a role model towards society that we shall educate them especially in financial planning to ease their burden.

**With my Role Model Mr. Andy Lim**

# Great Eastern

A member of the OCBC Group

The friendship bond that we tied makes me even want to go further

**One of the environment in Forest City**

**A short visit to Forest City**

**I have to say that I have no regret by joining this internship program which actually gave me a thousands of valuable memories**
