MY EXPECTATION

- Hi everyone!!! First, I want to share my experience during my internship programme. Actually, I do not know anything about takaful and insurance or something like protection and saving money. First day im there, I feel so uncomfortable but I guess it just a moment and try to adapt the situation. After one day to one day, I think that this industry is quite good because we try to educate the people about financial. This programme teach me a lot about financial like how to manage it and how to transfer the financial worries. I also get a lot of kind friends that I call them family. I hope I can improve my life and achieve financial freedom as soon as possible.

- After 1 month I join this programme I feel so happy and worth it because there are many knowledge and memories that other person cannot have like me. If I do not meet Mr Andy and Ms CCYF at career fair at UPNM maybe I do not know anything about this industry.

- Finally, thanks to all my friends that support and help me during the programme. I will remember you all forever and keep the memories fine.
